

HOUSEHOLD HAZARDOUS WASTE DROP-OFF

WHEN: Every Thursday, July through October
2:00 pm - 7:00 pm

WHERE: *NEW LOCATION:*
175 Westheimer Dr., Monroe 45044

DIRECTIONS: www.butlercountyrecycles.org

ACCEPTABLE ITEMS

- ✓ Oil-based Paint*
- ✓ Antifreeze/Gasoline
- ✓ Motor Oil/Heating Oil
- ✓ Pesticides & Fertilizers
- ✓ Solvents/Thinners
- ✓ Cleaners
- ✓ Household/Auto Batteries
- ✓ Fire Extinguishers
- ✓ Propane Tanks/Oxygen Tanks
- ✓ Mercury Thermometers
- ✓ Fluorescent Bulbs - All Sizes
- ✓ Driveway Sealer
- ✓ Thermostats
- ✓ Lawn & Pool Chemicals

DO NOT BRING

- ✗ Latex Paint*
- ✗ Radioactive Materials
- ✗ Medical Waste
- ✗ Explosives/Ammunition
- ✗ Smoke Detectors
- ✗ Electronics - Computers/TVs
- ✗ Appliances
- ✗ Unmarked Cylinders
- ✗ Fireworks/Gun Powder
- ✗ Prescription Drugs

*DO NOT BRING LATEX PAINT!

Latex paint can safely be disposed of with your regular trash. Paint cans should be less than 1/2 full. Leave the lids off the cans and mix with sand, kitty litter or sawdust to absorb the paint and speed the drying process. Once the paint is hardened, place the can next to your trash with the lid off so your waste hauler can see the paint is dried. Leave no more than four cans at one time for curbside collection.

Materials from businesses, contractors, and schools will not be accepted.

FREON APPLIANCE RECYCLING

- WHAT**
- Refrigerators
 - Freezers
 - Dehumidifiers
 - Air Conditioners

- WHERE**
- Collection at the curb/driveway

- WHEN**
- April through October

- CALL**
- Unwanted Appliances at 1-888-886-9268 to schedule a pick up.

Residents need not remove Freon. Freon is managed by certified technicians, and appliances are recycled.

No more than two (2) like appliances per pick up.

Residents may take non-Freon appliances (washers, dryers, microwaves) to local scrap metal dealers.

Materials from businesses, contractors, and schools will not be accepted.

GUIDE TO DISPOSING LATEX PAINT

Did you know...

...There are two types of paints commonly sold for home use: **water-based latex paints** and **oil-based paints**.

OIL-BASED PAINTS, (as well as wood finishes, shellacs, varnishes, wood protectors, mildew resistant paints, and "preservative" paints) must all be brought to a household hazardous waste drop-off to be properly disposed of.

LATEX PAINT (a.k.a. water-based, acrylic, or emulsion paint) is comprised mostly of water and can be disposed of in your household trash as long as it is solidified first.

Latex paint must be dried up before placing paint cans with your regular trash. Please be sure that your paint is completely solidified. Liquid paints can spill during the collection process; paint leaking into trucks and onto roadways poses cleanup challenges.

The best ways to manage latex paint are to:
Use it up! Dry it up! Pass it on!

Use it up!

Small amounts of paint can be mixed with other colors or bulked together and used as a primer coat or on jobs where the final finish is not critical.

Avoid creating waste at the start, buy only what you need. One gallon of paint will cover between 250 and 350 square feet, depending on the porosity of the surface to be covered. A gallon of paint will cover closer to 250 square feet of surfaces that are more porous.

See back for more ➔

Dry it up!

Place in a well ventilated place, where children and animals won't get into it.

You have three options:

1. **Air dry.** Allow paint to dry in cans by removing lid and allowing liquids to evaporate. Paint cans should be less than 1/3 full. This can take several days. If more than 1/3 full, pour some into coffee can, ice cream bucket, or similar container.

2. **Use a drying agent.** Mix in an equal amount of an absorbent material and allow paint to dry. Use cat litter, sawdust, sand or "waste paint hardeners" found at home improvement centers.

3. **Pour thin layers (about 1" of paint) into a cardboard box lined with newspaper.** Allow paint to dry one layer at a time until all paint has hardened. When first layer has hardened, pour in another layer. When you've dried out all paint, put box out with your regular trash.

Once paint in cans is thoroughly dry, paint cans may be discarded with your regular trash.

Leave lid off can so waste collector can see paint is hardened. Place cans with lids off next to your regular trash. You may place up to four paint cans out for collection at one time.

Pass it on:

Donate nearly full cans of latex paint. Religious groups (Call Matthew 25 Ministries to donate paint – 793-6256), community groups, and theater groups will accept unopened cans of paint – especially white paint. Even a neighbor may need extra paint. Also, check your paint store's policy on returning unopened cans of paint.

Please DO NOT bring latex paint to Butler County's Household Hazardous Waste Drop-Off program. Only Oil-based paint will be accepted.

DO NOT dump paint on ground or down storm drains – it will travel directly to surface and/or ground water.

DO NOT pour paint down a drain. While small amounts of latex paint can safely be washed down drain to a septic system or wastewater treatment plant, this practice should be kept to a minimum. Limit this to brush cleaning and other clean-up.

DO NOT throw liquid paint in regular trash. Leaking paint spills out of waste collection vehicles onto city streets making a mess that is difficult to clean up.

RECYCLE... It's easy to do!
